YUTELSAT PLAYER is a program which allows you to view TV channels online. It can be easily used by individuals of any experience level. YUTELSAT PLAYER is the perfect solution for all categories of users who wish to watch TV channels online without expensive subscription charges. Install the application on your PC, go online and enjoy premium online TV anywhere in the world. You can also sign in to your account using your Facebook account or your Google account. Note: In this version of YUTELSAT PLAYER, we fixed the following issues: Sometimes, YUTELSAT PLAYER didn't show channels in certain countries and didn't allow you to make changes to your favorites. This was caused by incorrect data in the application's data files. It wasn't possible to pause or watch live TV programs. This was caused by a system error. Now you can read information about your favorite stations right from the main interface of YUTELSAT PLAYER. We continue to improve the software, but we'd like to inform you that the next update will include the following changes: You'll be able to access additional countries, such as Spain and France. We plan to provide an option to reduce the number of downloaded ads. Right now you can only use YUTELSAT PLAYER to watch TV channels online. But you can also use it to watch videos online, listen to radio, read news, access your Facebook account and listen to podcasts. You can also view statistics, organize your favorite TV channels, set the number of downloads per day, check the weather, access your Google and Twitter accounts, and more. It is possible to use compression that provides a large and powerful compression gain with a high computational complexity. On the other hand, the well-known Lempel-Ziv algorithm (LZ77) is much faster but provides a much smaller compression gain, which we showed in this article.
