

Integard is an internet usage monitoring application for PCs running MS Windows which provides simple reporting and parental control over the internet use of your children and employees. Integard Professional features: Profitability: Support for children (under 16 years old) or employees (under 18 years old) Remote operation (over the internet) Customer support Available for both Server or Client PC platforms Features auto-detection of children/employees Internet usage statistics for employee/child System auto updates Online and offline reporting of data Content screening Parental settings E-mail alerts Delivery of warnings via SMS, e-mail or JPG/JPEG attachment Log all IP addresses of child/employee Which internet browsers are used Security risk warning With Integard Professional: The child/employee is protected from predatory ads, pornographic sites, inappropriate e-mail, and scripts that can compromise your business. Integard Professional is designed with your company's bottom line in mind. Integard Professional uses a 5 point rating system for each internet browser that the child/employee uses. The ratings are 1-5 with 5 being the highest and 1 the lowest. If a rating is reached the system does not allow internet access until the rating is remedied. In addition to the ratings the system looks for suspicious websites. These websites are screened for harmful content. Whether it is a commercial enterprise with ads, or a gambling site, anything that can harm you should be avoided. Integard Professional includes a Content Warning System that can be used to warn employees and children who may be accessing inappropriate websites or other content that is not permitted in your business. Integard's features and benefits are as follows: Works in stealth mode (Behind the scenes) that allows it to remain undetected. Operates on either a Windows Server or Desktop PC. Provides personalization by selecting whether the configuration should be displayed in English, French or German. Provides a day and night mode configuration. Provides remote control of the internet usage allowing monitoring from your desktop PC. Provides data collection from both desktop and server computers. Provides security both during online operation and offline (system is not powered up) by blocking the programs that the child/employee uses to access the internet. Filters can be installed on as many computers as you like. Integard Professional is easy to use, setup and customize. System administrator or students can be used to configure

What's New in the?

Integard Professional is a complex application which will help you monitor and control internet usage in your organization resulting in increased productivity saving time and money. Flexible deployment options allow Integrad to be installed on a server or the desktop. The XPoint memory modules in Intel's new line of Haswell-E and Broadwell-E chips will run at a data rate up to four times that of DDR3 DRAMs. XPoints could enable servers to hold terabytes of information. More than one XPoint memory module can be stacked together to form an addressable storage device. The record data rate for an XPoint memory will be 1.33 terabytes per second -- 1.6TB/s. XPoint memory is based on a cross-point switching architecture -- data written to one location in the block is available across the entire

Daedalic Entertainment is happy to announce the launch of a new website dedicated to our upcoming PC and Mac game, Strange Cults. This website contains detailed information on the game and it will be updated regularly with new information.
