VSTweak is a Visual Studio PowerToy. Why look for simple shortcuts when you can create your own using VSTweak? The best part about VSTweak is that you can create your own mappings or mru's and even edit your own command window. VSTweak is free and nothing's setup, just plug and play! What's in the Help Guide: There are no tutorials at all that will show you how to use VSTweak, if you are looking to learn how to use this tool, we suggest that you read the help guide instead of reading the FAQ. If you aren't sure what file you are supposed to edit, check out our video tutorials below. We have created a single video to be used as a tutorial of how to get around the VSTweak GUI, in case the help guide is a little too technical for you. Our Tutorial: Today we are going to be showing you how to use VSTweak by editing two different files, the.rdr file which will allow you to add many mappings to VS and the.mcx file which contains all the shortcuts that you use each time you open VS. This was my first time using this tool. It was very easy. I followed all the instructions and was up and running in no time! Heres some screen shots of what i did. Hello, I'm using VS2010, and I like how VSTweak works on a single-monitor with two different monitors, which I prefer for my coding. However, I would like to add one last tweak (I'm not sure if it's possible) to get the same behavior: with the files open, when I hover over one file, I like the background color to turn black, so I know that I can hoover over the other file. The behavior I'm looking for is like in this video: Hi, I have the same issue as bibi987: trying to watch a video (on Windows XP, the VS2010 video player is a huge mess, the v. 8 one is ok) and not able to do so - I keep getting the "waiting for browser to finish activity" and then, after I have stopped the activity, the video is fast-forwarded to where it has ended. Hi,
