What's New in the ToXML?

toXML is a FREE software designed to help you to output a Microsoft Excel 2007 file to XML as necessary. You can easily convert the worksheets of any MS Excel to XML and save it to a text or binary file without using any extra software. The main objective of toXML is to enable you to convert the Excel files as described earlier. toXML Features: 1. You can easily specify the file to be converted, including all the necessary information (row or column numbers and number of blank rows) and all the worksheet contents. 2. There are two way to output, either in ASCII or in binary. This is an important feature because it is most likely that you will not have access to Internet Explorer to view the

output file. 3. A preview of the conversion is presented before output, allowing you to easily choose the method of conversion. 4. The output file generated from toXML is flexible; it can be used in any third-party software to import the output data. 5. The application allows you to specify the output folder, where all the generated files will be located. toXML Pricing: 1. You will need to install toXML on a computer that will be able to receive all the files generated from Excel file conversions. 2. The files created by toXML will be saved on the computer of the user that is running toXML. 3. This application is free to use. 4. toXML is a FREEWARE application, which means that you are free to use it for any purpose, even commercial ones. 5.
