Lodgit Desk Crack + Download PC/Windows (Updated 2022)

Lodgit Desk Full Crack is a web-based application that helps manage a hotel business in a web-enabled environment. It offers simple means of booking reservations, event planning, inventory management and property reports. It also assists you in tracking guest services and special situations that occur at your establishments. Features: Multiple establishments The application lets you maintain one database for multiple establishments. In addition to the main booking page, there is an administrative area with access to the data storage and reporting functions. In addition to the ability to keep track of several properties in a single account, you will also be able to perform searches that permit you to see the characteristics of the property, as well as the number of rooms, floors, etc. Also, this software offers a booking calculator and review of reservations. Booking tool Lodgit Desk offers a booking tool that permits you to organize events, find a room that is available for certain dates, and compare prices. Also, it's designed to perform searches for the facility and the dates of a specific type of event, and the search results are displayed as an interactive timeline. The developer of this software, Lodgit Desk, also offers an event planner tool. It makes it possible to plan out the events in a timeframe and pick the specific date. Inventory management Management of inventory is simple with the help of the inventory overview tool. In order to manage items, such as food, drinks and decorations, you can add items to the database and assign them inventory numbers. You can view the items as well as their price and stock, you can also add notes to each one. You can adjust items and their prices using the list of items and their respective prices. System reports The system reports application lets you view an interactive summary of your properties and how they are performing. In addition to the number of reservations, you can determine the month and year that have the largest number of visitors, as well as the room rate of accommodations. Also, you can determine which areas are in trouble and which are generating income. Ratings and reviews The user reviews system in Lodgit Desk is simple to use, but makes it possible for customers to leave customer feedback. They can add notes as well as review areas such as food, service, price and others. After you have posted these reviews, the general manager, or the person who issues customer service, can view them. What's new in version 5.0.1:  Added support for new function "Day part viewing".
