

IRender nXt - the only SketchUp renderer you'll ever need! If you can draw it in SketchUp, . Thea Render is a powerful rendering extension for SketchUp. Thea allows you to visualize, create panoramas and use various viewing modes. This extension can also be used to export and import images to Google Earth and Google Mars. In addition, Thea can export images to various formats such as PNG, JPG, and GIF. Thea provides the ability to manage color and textures, as well as create and use different types of textures and materials.
