mescope ves v5.1. the vibrant mescope rv5.0  
software is a professional software package  
for the analysis, qualification, and reporting of  
vibration data from the land. it includes tools  
to easily and accurately identify and quantify  
soil and rock seismic signals, which are very  
useful in establishing the degree of  
vulnerability of a site. the software can be  
used to check the suitability of a site for  
seismic reinforcement, to qualify new or

---

existing seismic countermeasures, to perform seismic qualification testing, to establish the soil strength of a site, to qualify and monitor construction site remediation, and more.
