

Beyond the Tunes: A Step-by-Step Guide how to check airpods battery

In this digital era, wireless earbuds have become an essential accessory for many, and Apple's AirPods stand out as a popular choice. With their seamless integration with Apple devices and sleek design, AirPods offer a unique listening experience. However, like any electronic device, monitoring the battery life of your AirPods is crucial to ensure uninterrupted enjoyment. In this comprehensive guide, [how to check airpods battery](#) we'll delve into the various methods available for checking your AirPods' battery levels, empowering you to manage your listening sessions with confidence and ease.

Understanding AirPods Battery Life

Before diving into the specifics of checking your AirPods' battery, it's essential to understand how their battery life works. Each AirPods has its battery, as does the charging case. When fully charged, AirPods typically offer around five hours of listening time and up to 24 hours of additional charge via the charging case. However, these figures can vary based on usage habits, environmental factors, and the age of the device.

Method 1: Using Siri

One of the simplest ways to check your AirPods' battery levels is by using Siri, Apple's virtual assistant. With Siri's hands-free functionality, you can inquire about your AirPods' battery status without lifting a finger. Here's how:

If you prefer a more visual approach, you can check your AirPods' battery levels directly on your iPhone or iPad. Follow these steps:

Open the AirPods case or put your AirPods in your ears.

Unlock your iPhone or iPad and navigate to the Home screen.

Open the AirPods case near your device, or ensure that your AirPods are connected.

A pop-up window will appear on your device's screen, displaying the battery levels of both your AirPods and the charging case.

Method 3: Using Control Center

Apple's Control Center provides quick access to various settings and features, including your AirPods' battery levels. Here's how to check them:

Ensure that your AirPods are connected to your device.

Swipe down from the top-right corner of the screen (or swipe up from the bottom edge, depending on your device model) to open the Control Center.

Look for the "Now Playing" widget, which should display your AirPods' battery levels alongside other audio controls.

Method 4: Checking on Apple Watch

If you're using AirPods with an Apple Watch, you can conveniently check their battery levels directly from your wrist. Follow these steps:

Put on your Apple Watch and ensure that it's unlocked.

Open the "Now Playing" app or start playing audio on your AirPods.

Swipe up on the Now Playing screen to reveal additional options.

Tap on the battery icon to view the battery levels of your AirPods and the charging case.

Method 5: Using Bluetooth Settings (for Non-Apple Devices)

While AirPods are designed to work seamlessly with Apple devices, they can also be paired with non-Apple devices via Bluetooth. If you're using AirPods with a non-Apple device, you can check their battery levels through the device's Bluetooth settings. Here's how:

Open the Bluetooth settings on your device.

Find your AirPods in the list of available devices and select them.

The device should display the battery levels of your AirPods.

Conclusion

Monitoring your AirPods' battery levels is essential for ensuring uninterrupted listening pleasure. By familiarising yourself with the various methods available for how to check airpods battery, you can stay informed and make the most of your wireless listening experience. Whether you prefer using Siri, your iPhone or iPad, Control Center, Apple Watch, or even a non-Apple device, there's a convenient way to keep tabs on your AirPods' battery levels at all times. So, next time you're gearing up for a listening session, take a moment to check your AirPods' battery, and enjoy your favourite tunes without interruption.
