ABOUT US

Founded in 2016, SUDU Industrial is a Dubai-based high-tech enterprise specializing in innovative, eco-friendly energy solutions. We focus on the development, production, and sales of oxy-hydrogen generators, engine carbon cleaning machines, catalytic converter cleaning machines, and oxy-hydrogen welding machines. Operating from an 8,000-square-meter facility, we are committed to sustainability and technological advancement. Our oxy-hydrogen generators efficiently convert water into hydrogen and oxygen, offering a clean, powerful energy source that reduces carbon emissions and enhances industrial efficiency. With a strong focus on innovation, quality, and customer satisfaction, SUDU Industrial is driving the shift toward greener industrial practices. We're not just producing machines—we're building the future of sustainable energy.

OXY HYDROGEN CUTTING MACHINE DUBAI

At SUDU Industrial, we provide advanced Oxy Hydrogen Cutting Machines in Dubai, designed for precision, efficiency, and eco-friendly performance. Ideal for a wide range of industrial applications, our machines use water electrolysis technology to generate clean-burning oxyhydrogen gas, offering a safer and more sustainable alternative to traditional fuel-based cutting methods. Whether you're cutting metal, glass, or other materials, our systems deliver smooth, high-quality results with minimal residue and reduced energy consumption. Backed by robust engineering and user-friendly controls, SUDU's cutting solutions are trusted by manufacturers, workshops, and industrial clients across the UAE. Choose SUDU Industrial for innovative cutting technology that meets your performance standards while promoting environmental responsibility. Contact us today for customized solutions and expert support.
